SUMMARY

An enthusiastic software developer and QA automation analyst with thorough experience in test automation, CI/CD pipelines, and enterprise IT infrastructure across dynamic environments.

Proven track record in optimizing regression suites, automating RESTful APIs, and streamlining deployment workflows.

SKILLS

- **Multilingual:** Bilingual in English and Vietnamese, with a growing proficiency in French
- **Communication:** Strong teamwork skills with an ability to explain technical jargon in easy-to-understand terms
- **Adaptability:** Perform well under pressure and in dynamic environments
- **Lifelong Learner:** Positive attitude with a proven ability to quickly acquire new technologies
- **QA & Test Automation:** Proficient in Selenium WebDriver, Postman API testing (JWT/Auth0), functional automation testing, and Jira defect lifecycle tracking
- **Software Development:** Competent in developing APIs and software using C#/.NET, C++, Java, Python, SQL, frontend tools (React, Vue.js, JavaScript), and version control (Git)
- **IT Infrastructure:** Solid understanding of hardware, networking (OSI model), and virtualization platforms (Microsoft Hyper-V, VMware vSphere)
- **DevOps & Infrastructure:** Experienced with Infrastructure as Code (IaC) tools (Ansible, Terraform), Agile methodologies, and automated CI/CD workflows using Azure DevOps
- **Enterprise Management:** Proficient in Microsoft enterprise management tools: Intune, Entra ID, Exchange, and Active Directory Users and Computers (ADUC)

EXPERIENCE

Automation Test Developer

May 2026 – August 2026

CARFAX Canada, London, ON

- Redesigned parallel execution across 6 Selenium repositories, cutting a 115-test regression suite runtime by 45% (from 70+ to 35–40 minutes) while maintaining a 95%+ pass rate
- Automated daily CI/CD pipeline schedules in Azure Pipelines to execute cross-repository regression suites and autogenerate daily execution reports for Scrum Masters and Project Managers to verify deployment readiness
- Stabilized flaky automation across all active projects, eliminating false positives to reliably catch software bugs and defects before production releases
- Authored 90+ Jira tickets covering functional test automation, performance optimization, and bug reporting, taking full ownership of defect tracking and technical documentation
- Covered manual QA responsibilities during primary tester PTO, replacing manual Swagger API checks by automating 60+ endpoints in Postman using JWT and Auth0

NSC Support Analyst - Tier 1

August 2025 – December 2025

Emco Corporation, London, ON

- Engineered an automated Windows deployment workflow using XML answer files and Windows Autopilot, reducing manual configuration time by 75% per workstation
- Resolved 80+ technical incidents weekly via Ivanti Service Manager, scaling to 120+ during peaks, with a 60%+ first-call resolution rate across hardware, software, and network tiers
- Administered 3,000+ user accounts and security groups within Microsoft Entra ID and Intune, ensuring Zero Trust compliance and seamless resource access for hybrid personnel
- Facilitated after-hours technical support (5 PM – 8 PM EST), delivering critical incident response for Pacific Time Zone operations to ensure cross-country branch availability

Information Systems IoT

January 2025 – April 2025

Eramosa - A CIMA+ Company, Guelph, ON

- Automated virtual machine provisioning using custom XML unattended installation scripts, accelerating environment setup by 75% for development and testing teams
- Developed reusable Infrastructure as Code (IaC) playbooks using Ansible and Terraform, automating network configurations and reducing manual deployment errors by 50%
- Engineered a standardized, security-hardened Windows Subsystem for Linux (WSL) environment to integrate Linux tools into Windows workflows with 100% environment parity
- Orchestrated multi-tenant virtual infrastructure across VMware ESXi and Hyper-V, applying OSI model principles to resolve complex VLAN and routing issues

EDUCATION

Computer Programming and Analysis (Co-op)

September 2023 – Present

Advanced Diploma, Fanshawe College, London, ON

- Maintained a GPA of 4.2/4.2
- Received Dean's Honour Roll every semester (F2023, W2024, F2024, S2025, W2026)
- Awarded the International Vietnam Language Excellence Entrance Award (CA\$2,000) and the Karen L. Monahan International Award (CA\$750)
- Developed APIs and software using C#/.NET, C++, Java, Python, SQL, React, and Vue.js

VOLUNTEER

Peer Mentor

January 2024 – Present

School of Information Technology, Fanshawe College, London, ON

- Explained complex technical concepts in simple language for non-technical stakeholders
- Adapted tutoring strategies to the learning styles of students with different levels
- Applied critical thinking to identify and resolve students' problems
- Led cross-functional teams in discussions to develop solutions and improve processes
